

NEW EVALUATION PROCEDURES ADDED TO MY PRACTICE

I firmly believe that **Nutrition Response Testing** which utilizes muscle testing protocols is a very effective and inexpensive way of analyzing your body to identify health problems, the underlying cause, and the nutrition and nutritional supplements specific for resolving the problem for each individual.

I also believe that properly designed laboratory tests and interpretation of results also offer a very unique insight into the health of the individual and the nutritional remedies that will help the body to heal itself

That is why I am adding customized laboratory testing and evaluation with nutrient recommendation to my practice. This is an option for anyone, especially those who are unable to come to the office for muscle testing (online clients).

I have successfully completed a training program to become a **Science Based Nutrition™** affiliated practice as well as Florida board of pharmacy certification for evaluating laboratory tests.

I am also adding ZYTO scan as an option for anyone, especially online clients.

Each of these methods of health evaluation can be used alone or in combination, to help understand the underlying cause of health issues to offer the best recommendation for resolving the condition naturally with nutrition and nutritional supplements.

With all the cleverly marketed supplements, fad diets and conflicting nutrition information available today, it can get confusing. We use specific testing (like blood work) or muscle testing to formulate vitamin and nutrient recommendations specific to YOUR body's needs. No more guessing!

These tests can also indicate if you are progressing toward the development of a serious illness or disease. Are you already taking medications? Get to the root of the problem with our nutritional analysis and see your personal health transform.

By retesting, we can monitor your progress and adapt your personal program based on how your body responds to the recommendations.

Contact our office today to set up your appointment.

Early detection and correction are key elements to living a healthy life. We look forward to serving your nutritional needs.

Yours in Health,

Dr Nwando Nwanna PharmD
